

STRUCTURAL SCOPING & ESTIMATING DIVISION

edjuster's Structural Scoping and Estimating Division services property damage to residential homes and commercial structures. edjuster's claims experts will provide rooms/building/structure impact detail reports, photographs of damage and structural scoping or estimating to insurers by edjuster experts, while on contents field assignment or as a "stand alone" program.

THE STRUCTURAL SCOPING
SERVICE PROVIDES A **SAVINGS**
ON OVERALL COSTS AND
EXPEDITES THE CLAIMS
PROCESS.

As a leader in contents claims management for over twenty years, edjuster has the expertise, personnel, technology and resources to meet all claims needs.

By offloading the structural scoping work to edjuster, clients benefit from an overall **28% cycle time improvement**.

THE NEED:

Expertise in structural scoping is necessary, in order to properly assess damage and provide full reports. Due to the complex nature of structural damage, edjuster's expertise with structural scoping drives better accuracy on the overall claim. Structural scoping and estimating expertise contributes to reduced cycle time and better accuracy on the assessment of these types of items.

THE BENEFITS:

By offloading the structural scoping work to edjuster, clients benefit from an overall 28% cycle time improvement. With edjuster's specialty scoping team, clients are in control of the claims process and experience a reduction in indemnity payouts and a reduction in LAE. Our professional, experienced field representatives are extensively trained in structural scoping, and committed to delivering exceptional customer service.
